

E-PRESCRIBING/ MEDICATION HISTORY CONSENT FORM

Dr. David Feinstein

Dr. David Feinstein's office uses an electronic medical record system that allows electronic prescribing of medications. Prescriptions are sent to your pharmacy through a secure connection, RxHub, which improves the accuracy and timely transmission of your medical information.

E-Prescribing greatly reduces medication errors and enhances patient safety. There are several standards that have to be included in an e-prescription program. These include:

1. **Formulary and benefit transactions:** Give the prescriber information about which drugs are covered by the drug benefit plan.
2. **Mediation history transaction:** Provides the physician with information about previous and current medications the patient is taking to minimize the number of adverse drug reactions.

My signature certifies that I have read and understood the scope of my consent and that I authorize the access of my medication history.
